Evidence Based Practice using MOHOST with clients with organic impairment

March 4, 2013

Hi There

We are currently working as O.Ts in an Old Age Psychiatry Team. We use the MOHOST as our initial assessment tool for people with organic impairment.

We are preparing a presentation for our multi-disciplinary team journals club. We are planning to present a case study highlighting the use of the MOHOST tool. We are looking for your help to gather evidence of good clinical practice within this area to share.

We would be appreciate your feedback.

Thank you.

Alison Fraser, Adrian Harrison, Tracy Wilson

Hi Tracy,

I wonder if the following references might be useful:

If I can be of any further help as you prepare your presentation, please do not hesitate to contact me directly.

Best wishes,

Sue Parkinson

A very impressive list of articles across a wide range of publications, thanks for sharing. We need to continue this strong record of studies validating the use of MOHO tools and MOHO-based interventions. Gail
